

Drobo is just about to make your world a whole lot easier.

(Three quick steps offered for the technically adept. For everyone else, please read the user's guide.)

1.

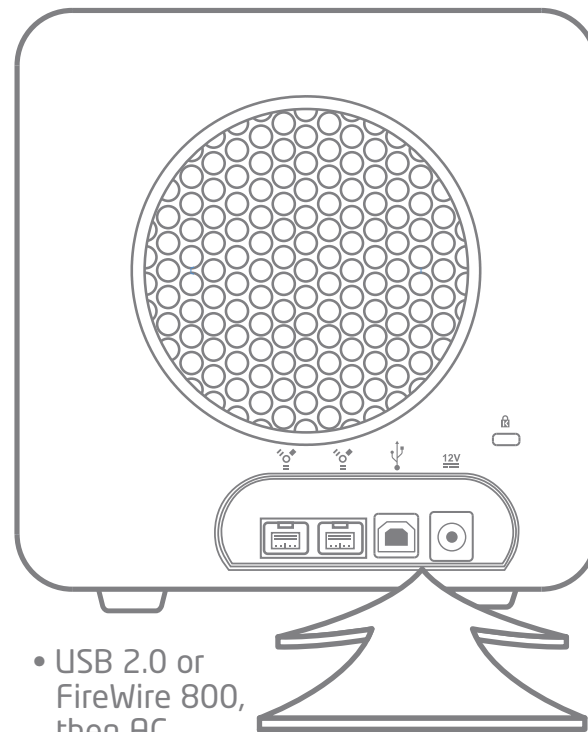

Insert Drives.

- Use any 3.5" SATA drives
- Any data will be erased
- Start with at least two

2.

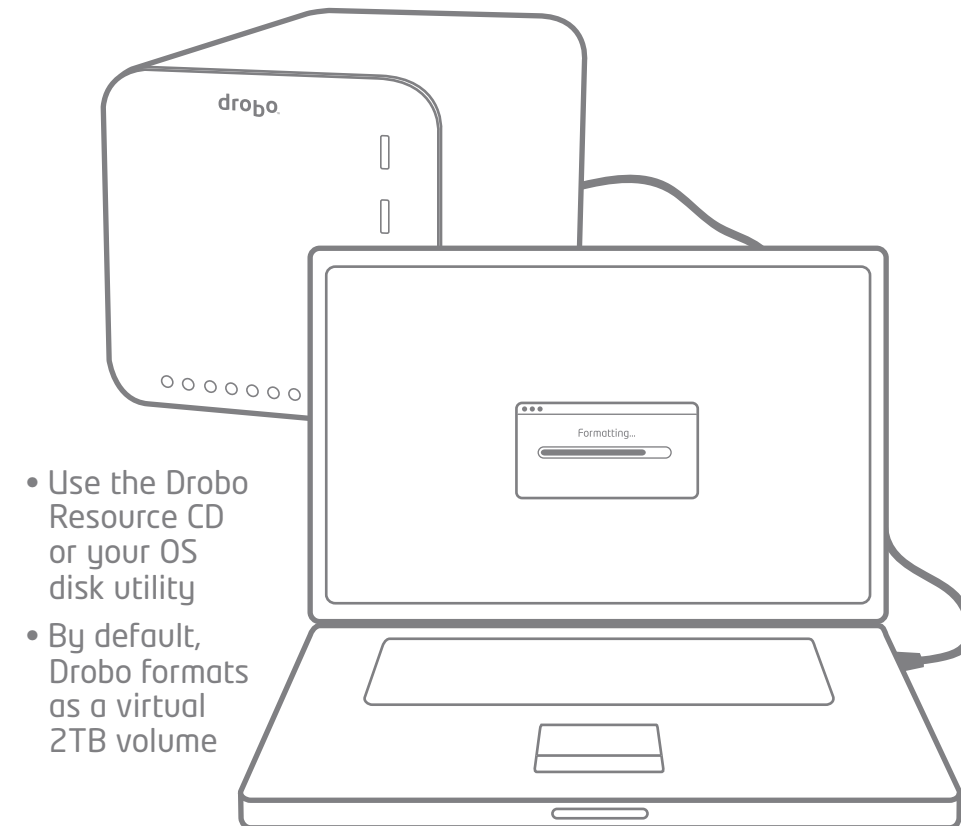

Connect USB or FireWire 800, & AC

- USB 2.0 or FireWire 800, then AC

3.

Initialize.

- Use the Drobo Resource CD or your OS disk utility
- By default, Drobo formats as a virtual 2TB volume

Now fill Drobo to your heart's content.
